Today's flow

Problem → System → Demo → Impact

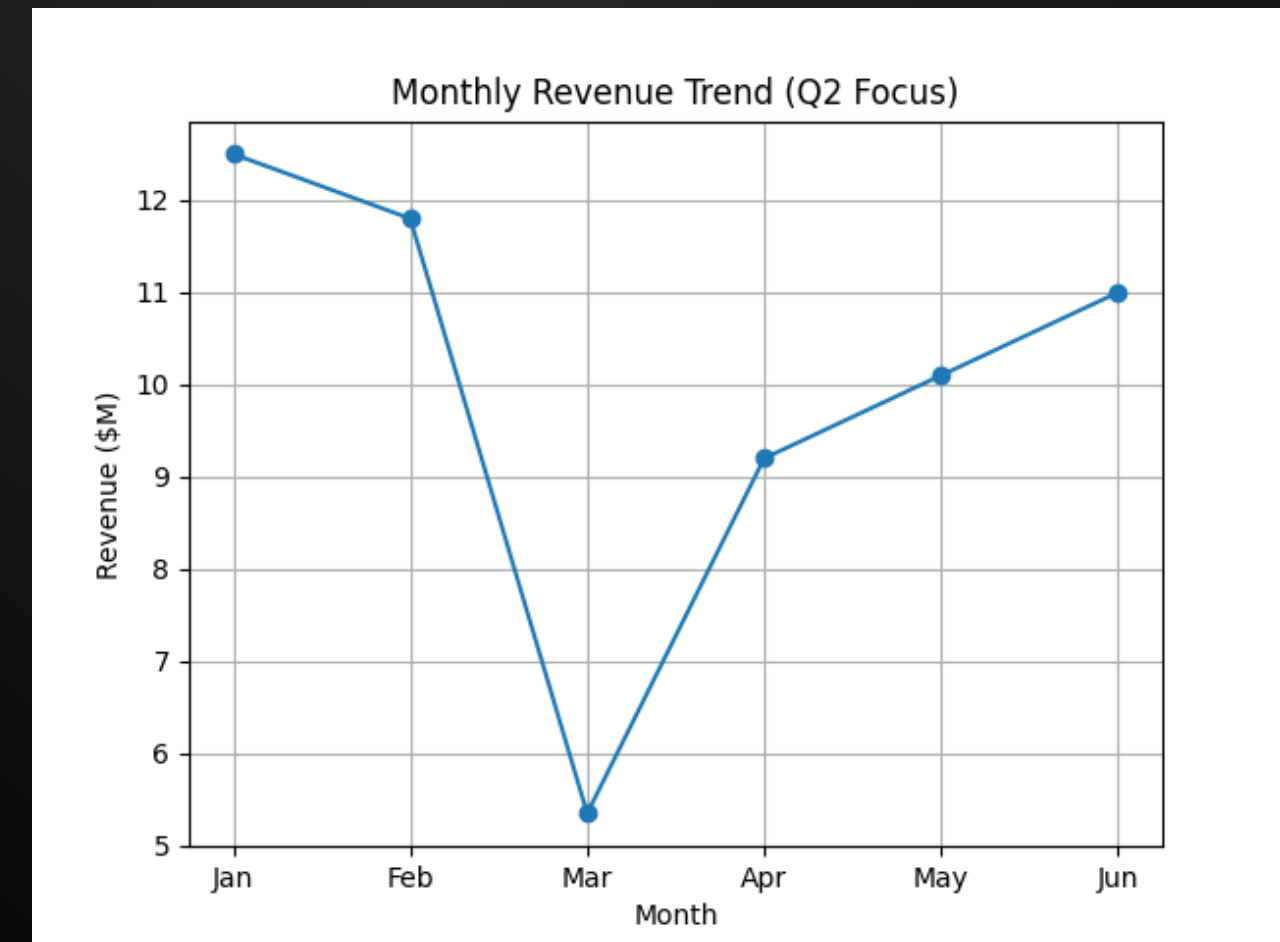

PROBLEM STATEMENT

Q2 Revenue Drop Analysis

- Slow manual analysis cycles
- Dependency on analysts for insights
- KPI delays impacting decisions

Data Callouts:

- Worst month: **Mar 2023 – \$5.35M (-52% vs avg)**
- North: **\$38.8M (29% contribution)**

How AI Agents Turn Data into Decisions

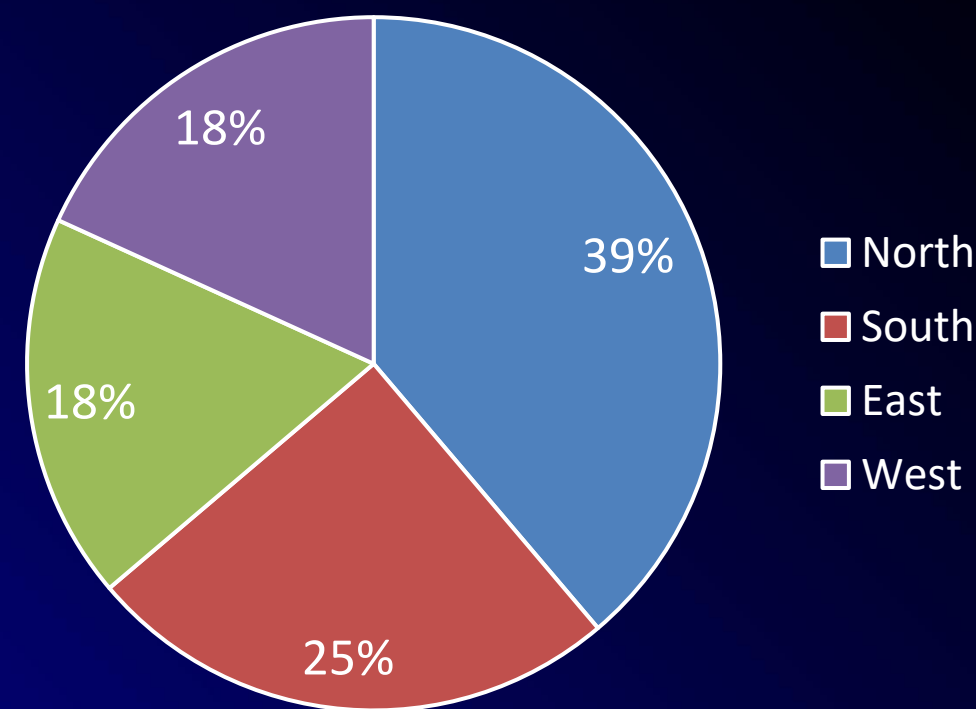

How decisions flow through the system

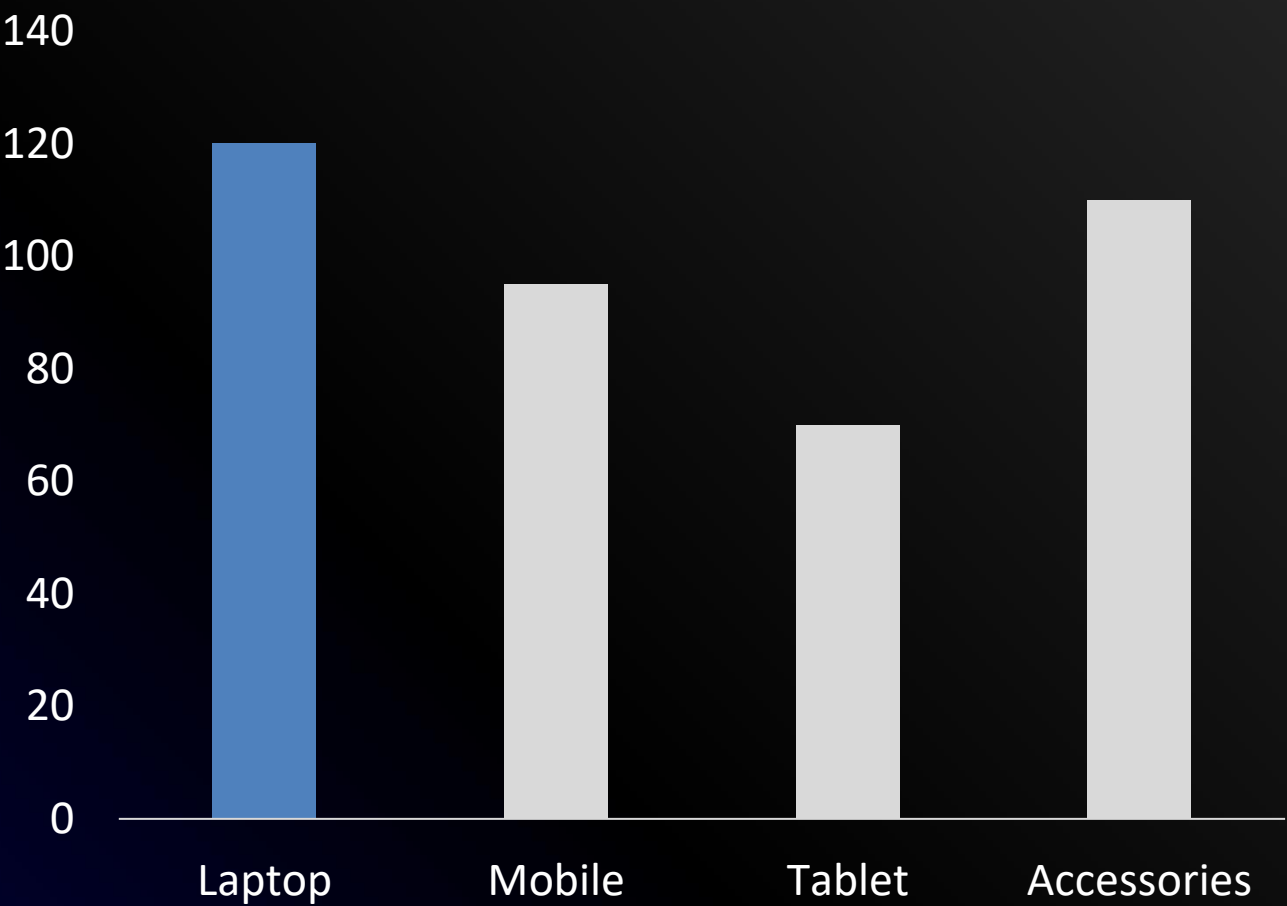

DATA SNAPSHOT

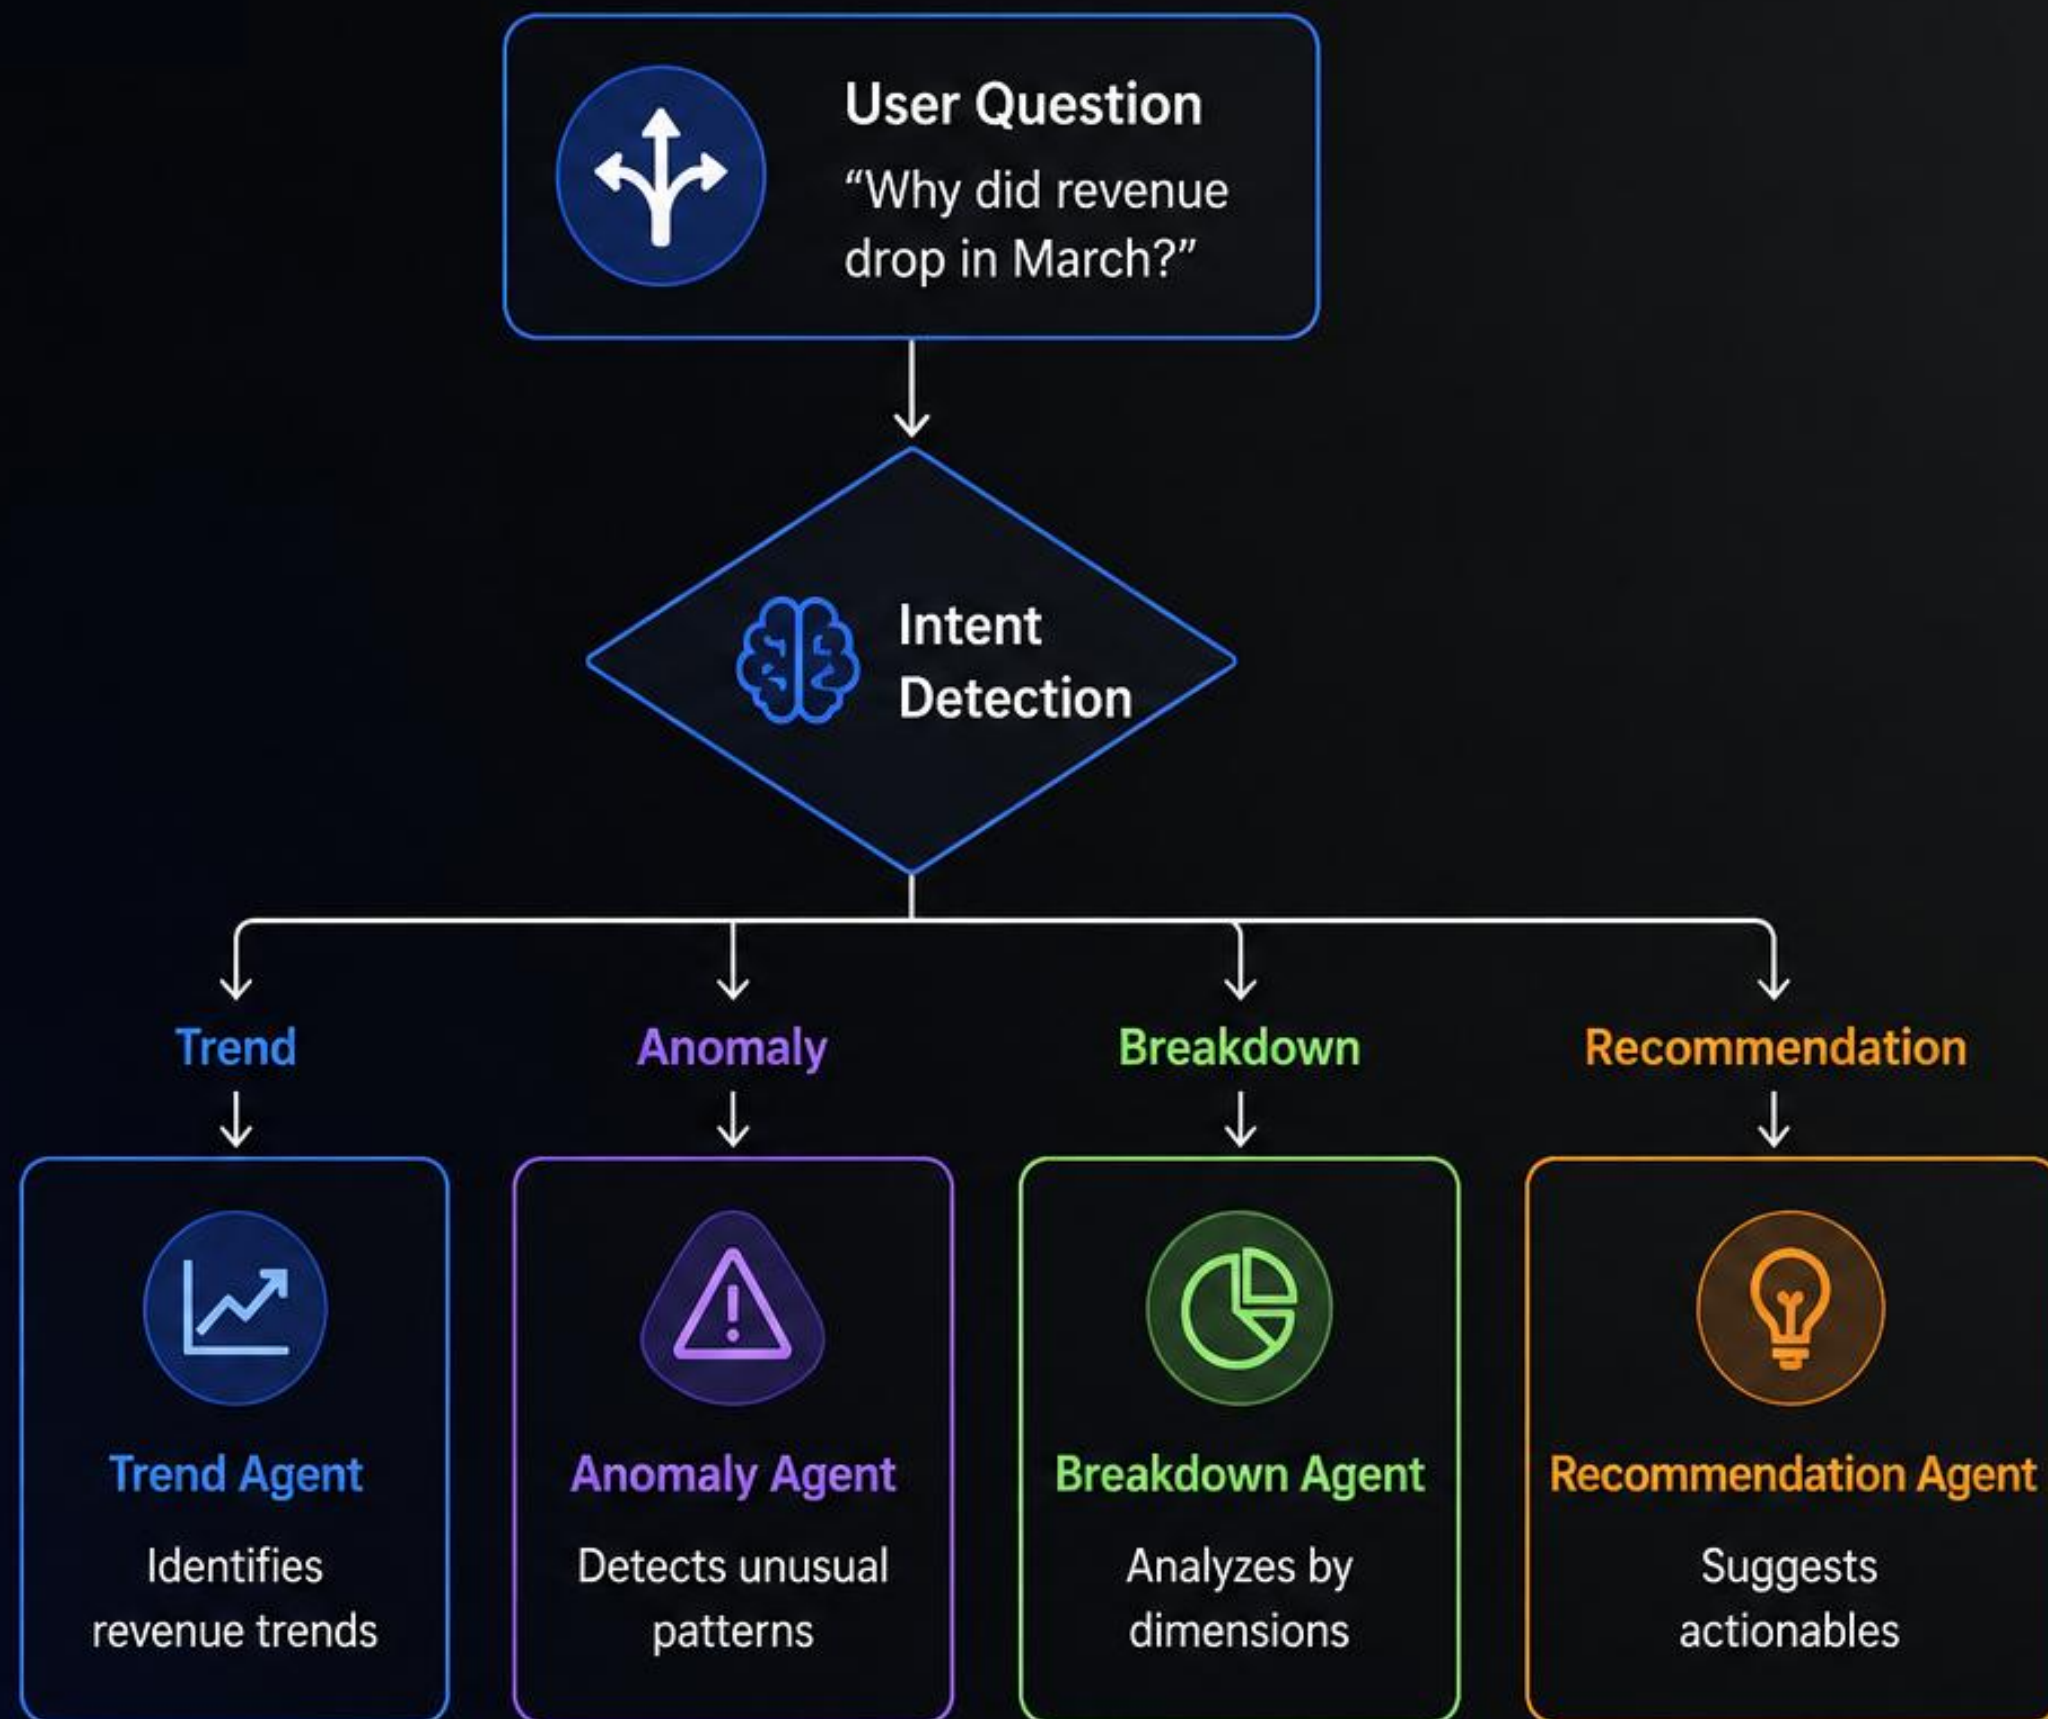

- Total Revenue: **\$134M**
- Top Region: **North – \$38.8M (29%)**
- Top Product: **Laptop – 41% share**
- Lowest Month: **Mar 2023 – \$5.35M**

Region Contribution

Product Performance

Trend Agent:

Revenue declining since Feb

Anomaly Agent:

March drop: -52% vs avg

Breakdown Agent:

Tablet category ↓ 18%

Recommendation Agent:

Focus on high-margin regions

Routing Example:

"Why did revenue drop in March?"

→ Anomaly Agent

LIVE DEMO FLOW

Business Impact

🕒 Time saved: **~2.5 hours per analysis**

- ⚡ Faster decisions
- 📊 Consistent insights
- 🔄 Reproducible workflows
- 📄 Audit trail for decisions

IMPLEMENTATION

Tech Stack:

- LangGraph (agent orchestration)
- OpenAI (LLM)
- Pandas (data processing)
- Streamlit (UI)

Dependencies:

- Clean structured data
- API access
- Basic infra
